PROFILE

Motivated and goal-oriented second-year student pursuing a degree in [Bachelors of science (Information Technology)]. Eager to learn and grow in a professional environment while applying classroom knowledge to real-world situations. Known for being a quick learner with strong communication skills, a positive attitude, and a willingness to take on challenges. Actively seeking opportunities to gain hands-on experience and contribute to team success.

EDUCATION

2024 – 2027 **Bachelors of science Information Technology**
bhandup (east) RAMANAND ARYA D.A.V. COLLEGE

SKILLS

learning skills : — **Frontend Development:** HTML, CSS. | — **LANGUAGE:** English , Marathi , Hindi | — **Soft Skills:** Project management, Team Leadership, Communication | — **CMS & Tools:** GitHub, Canva

COURSES

DRONE PROGRAMMING :

Developed and programmed a basic drone model to perform automated flight tasks using Python and Arduino. Integrated sensors for obstacle detection and stability control. Gained hands-on experience in drone control algorithms, hardware interfacing, and real-time data handling.

MACHINE LEARNING :

An ensemble machine learning pipeline for predicting product prices from catalog text descriptions. Ranked #2,200 out of approximately thousands of participants in the Amazon ML Challenge 2025, where I applied machine learning techniques on real-world datasets, built predictive models, tuned algorithms, and competed under strict time constraints.

PROJECTS

Puja-Vidhi Website

Developed a static multi-page **ceremony guide web application** that presents puja rituals and details in a clean, user-friendly interface. Included custom styling and layout to reflect cultural design aesthetics. Implemented interactive elements using JavaScript and organized content with HTML/CSS. **Key contributions:**

- Built multiple responsive HTML pages with consistent CSS styling.
- Enhanced user experience through simple JavaScript interactivity.
- Showcased ability to structure and present cultural content effectively online.

vedantwadekar49@gmail.com

Countdown Timer

Created a **countdown timer application** that allows users to plan for events by entering target dates. Designed a clear UI with visual countdown display to show remaining days. Focused on frontend implementation using standard web technologies. **Key contributions:**

- Built functional countdown logic with HTML structure and CSS styling.
- Demonstrated use of web standards to create interactive pages.
- Practiced modular organization of frontend code

Digital Invitation Card

Designed a **custom digital invitation card template** with HTML targeting easy personalization for events like weddings or celebrations. Simple file structure enables users to add images and text directly to the template. **Key contributions:**

- Implemented structured HTML to create a sharable invitation layout.
- Enabled customization of visual content by straightforward editing steps.
- Showed capability of building reusable frontend templates.

Birthday Card Webpage

Developed a **birthday greeting card generator page** with styled HTML and CSS. Users can insert images and text into predefined placeholders to create personalized wishes pages. **Key contributions:**

- Constructed multiple interlinked HTML files with cohesive CSS design.
- Focused on user customization and friendly presentation.
- Practiced layout and styling skills for celebratory web pages.

ACHIEVEMENTS

MICROSOFT MODULE :

Plane and prepare to develop AI Solution on Azure

CISCO :

Data Science Essentials With Python

simplilearn
